

# Winnipeg Transit Master Plan

Help us shape our transit system for the future!

## Introduction

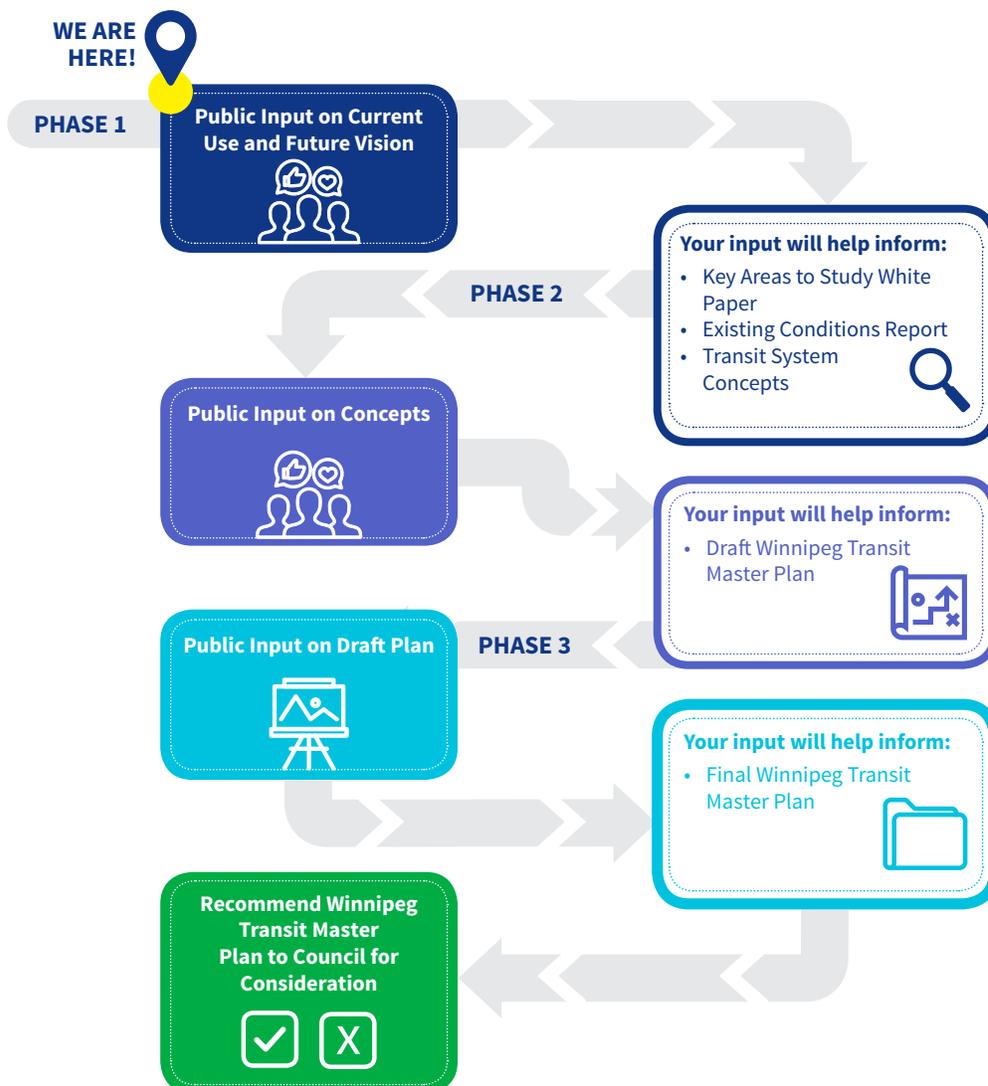

Winnipeg is growing and our transit system needs to grow too. In the next 25 years, we expect there will be nearly one million people living in our city.

Now is the time to think ahead about what kind of transit system we want for the future. How will we connect people and communities around the city in a way that is sustainable and efficient?

The Winnipeg Transit Master Plan will provide a 25-year vision for our transit system and identify the steps we need to take to get there. It will be a long-term, system-wide plan that will cover all aspects of the public transit system - Transit, Rapid Transit and Transit Plus (formerly Handi-Transit) service and infrastructure. The plan will build on the 2011 OurWinnipeg Sustainable Transportation Strategy and Transportation Master Plan as well as public input from the OurWinnipeg Review.

Over the next 12 months, you will have several chances to share your input and help shape Winnipeg's future transit system.

## Timeline

## What we will be talking about

As we begin planning for the future, we want to hear from you about what is and what isn't working about our transit system today. What is your vision of what Winnipeg's transit system looks like 25 years from now? How do we design a system that is efficient and easy to use, that is accessible and equitable for all? What ideas do you have that will help us build a transit system that is forward looking, sustainable, and affordable?

### Efficient & easy to use

Transit that provides frequent, fast service

Transit that is easy for all to understand, navigate, and use

### Connected & integrated

Transit that offers a variety of ways to get around

Transit that is integrated with other transportation options (like cycling, ride-sharing, walking, and driving)

### Accessible & equitable

Transit that enables people of all ages and abilities to get around the city

Transit that provides access and opportunity to people who need it most

### Visionary & sustainable

Transit that is forward-looking and supports goals for an active and healthy population with a low carbon footprint

### Affordable

Transit that is cost-efficient for current and future generations

### Other

## Get involved!

We want your help to shape Winnipeg's transit system for the future. Invite your friends, family and colleagues to share their ideas online and in person.
